WORK EXPERIENCE

Bitquery   **Feb. 2021 – Sep. 2024**
Backend Developer   *Paphos, Cyprus*

- Developed and maintained core systems, including an ETL processor, GraphQL API, and Explorer website for blockchain analytics.

- Added support for multiple blockchains (Tron, Ton, Everscale, Flow, Elrond), leveraging both **Ruby** and **Golang** stacks, that involved:
    o Deploying and configuring blockchain nodes and parsers in Docker and Docker Compose.
    o Developing ETL processors to extract and transform raw blockchain data into a structured format (e.g., transfers, calls, events).
    o Defining Protobuf schemas and setting up data streaming with Kafka for real-time data delivery.
    o Storing and managing data in ClickHouse for optimized analytics.
    o Implementing GraphQL APIs for data access and visualization in the Explorer project.

Expobank   **Jan. 2020 – Apr. 2020**
Backend Developer   *Moscow, Russia*

- Developed and enhanced web interfaces for loan issuance and processing as part of a collaborative team.

- Utilized PHP 7.1, MySQL, JavaScript, jQuery, HTML5, and CSS3 to improve functionality and user experience.

PROJECTS

- **adless - Local domains blocker written in Go.**

- **incache - Thread-safe caching library for Go.**

EDUCATION

Plekhanov Moscow Technical College   **May, 2021**
Information system and programming   *Moscow, Russia*

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Fundamentals of Backend Engineering

- **Skills:** Golang; Ruby; Ruby on Rails; Bash; ClickHouse; PostgreSQL; Kafka; GraphQL; gRPC; Protobuf; Docker; Docker Compose; Git; Ansible; Linux; Vim

- **Interests:** Board Gaming; Hiking
