WORK EXPERIENCE

Bitquery   **Feb. 2021 – Sep. 2024**
Backend Developer   *Paphos, Cyprus*

- Built ETL microservices to process data from 3 different blockchains, using Kafka to communicate between services.

- Developed a cryptocurrency and token prices parser by integrating with cryptorank.io API.

- Containerized services and blockchain nodes using Docker and managed their deployment with Jenkins.

- Implemented a gateway service to control access to API endpoints.

- Designed and developed real-time subscriptions for a GraphQL API using WebSocket and Redis.

- Optimized SQL queries to handle over 1+ billion rows stored in ClickHouse.

Expobank   **Jan. 2020 – Apr. 2020**
Backend Developer   *Moscow, Russia*

- Developed and enhanced web interfaces for loan issuance as part of a team.

- Utilized PHP 7.1, MySQL, JavaScript, jQuery, HTML5, and CSS3 to improve functionality and user experience.

PROJECTS

- **adless - Local domains blocker written in Go.**

- **incache - Thread-safe caching library for Go.**

EDUCATION

Plekhanov Moscow Technical College   **May, 2021**
Information system and programming   *Moscow, Russia*
