WORK EXPERIENCE

Exness

Go Backend Engineer

Aug. 2026 – Present

Paphos, CY

Symbiosis

Go Backend Engineer

Mar. 2025 – Aug. 2026

Paphos, CY

- Designed and implemented a blockchain event indexer supporting 60+ blockchains.
- Redesigned PostgreSQL database schema and optimized SQL queries, reducing REST API latency by 90%.
- Enhanced observability by adding logs, metrics, OpenTelemetry traces, Grafana dashboards, and Slack alerts.
- Implemented a refresh-ahead caching strategy for Redis-cached token prices using scheduled batch updates.
- Implemented error diagnostics by analyzing Grafana Loki logs to determine the root cause of failures.

Bitquery

Go Backend Engineer

Feb. 2021 – Sep. 2024

Paphos, CY

- Built ETL microservices to process data from 3 different blockchains, using Kafka to communicate between services.
- Designed and developed real-time subscriptions for a GraphQL API using WebSocket and Redis.
- Developed a cryptocurrency and token prices parser by integrating with cryptorank.io API.
- Implemented a gateway service to control access to API endpoints.
- Improved the Elrond blockchain API written in TypeScript by adding an endpoint to retrieve all necessary data from Elasticsearch in a single request, significantly increasing parsing speed.
- Containerized services and blockchain nodes using Docker and managed their deployment with Jenkins.
- Optimized SQL queries to handle over 1+ billion rows stored in ClickHouse.

PROJECTS

Local Domains Blocker

[adless](#) - CLI tool written in Go that aggregates, filters, and manages blocklists and whitelists. Designed to modify the system's hosts file to block unwanted domains without requiring browser extensions or background processes.

Thread-safe Caching Library

[incache](#) - A time-based caching library for Go, built to provide efficient, thread-safe in-memory data storage with features like automatic expiration, metrics collection, and event handlers for cache operations.

EDUCATION

Plekhanov Russian University of Economics

Information system and programming

May, 2021

Moscow, RU

SKILLS

- **Languages:** Go, SQL, Bash.
- **Databases:** PostgreSQL, ClickHouse, Redis.
- **API & Protocols:** REST API, GraphQL, WebSocket, gRPC.
- **Tools:** Docker, Jenkins, Prometheus, Git.

CERTIFICATIONS & INTERESTS

- **Certifications:** [Fundamentals of Backend Engineering](#)
- **Interests:** Board Gaming; Hiking
